

LAB HOUSEKEEPING

LAB SAFETY AWARENESS WEEK

Good lab housekeeping reduces the number of accidents, minimizes risks & consequences of slips, trips, falls, unplanned reactions and fire. Space is always at a premium. Don't be a hoarder!

- Reducing clutter provides more space for critical research materials, making it safer to move around the lab without tripping or potential chemical/biological exposure.
- Limiting or reducing flammable materials like paper or cardboard reduces the risk of fire.
- Never block emergency exits, fire extinguishers, safety showers, eyewashes, or electrical panels.
- Consider scheduling frequent lab clean-out days (at least quarterly). Inspections help keep the lab space clean and pristine. Establishing an internal inspections program improves the lab safety culture.
- Periodically thaw freezers.
- Make arrangements to service, maintain or remove broken equipment.
